

Manufacturers input wanted 11/15/11!

Dear BAMA Colleagues:

PTEC is partnering with MSSC (Manufacturing Skill Standards Council) to provide a nationally-recognized manufacturing standard (CPT) Certified Production Technician training. We are hosting an information session **TUESDAY, NOVEMBER 15, 11:45 AM – 1:00 PM** at the Clearwater Campus, Center of Excellence, building one, room 6. The address is 6100 - 154th Avenue North, Clearwater, FL 33760. If you or your training manager would like to find out more about this program, please attend this Lunch 'n Learn activity and enjoy lunch while you receive information. Attached is additional information about the first two course offerings. The total program encompasses four 30-hour courses: Safety, Production and Processes, Manufacturing and Quality, each of which leads to a nationally-recognized certification. Pending completion of all 4 courses qualifies candidate for CPT (Certified Production Technician certification).

PTEC certified instructor, Larry Ruegger will be available to answer questions about the certification courses planned for January 2012 and beyond. Class schedules are planned for afternoon/evening sessions two days per week, flexible. We will have textbooks and materials at the event for your review.

Certified training courses would be suitable for potential managers, new hires, and updating existing managers' skills. Upon successful completion, student may qualify for college credit or possible CEU's.

Please R.S.V.P. to Betty Hardy, Industry Services Coordinator, hardyb@pcsb.org or [727.538.7167, ext. 2072](tel:727.538.7167). (manufacturers only please)
